

FIBER TAP® PLUS SERIES

Multilink's forward thinking Fiber Tap® system has revolutionized the Fiber to the Home (FTTH) implementation process. This system simplifies design, installation, and maintenance of plant for your cutting edge FTTH system. The Fiber Tap® system utilizes the ability to connectorize, splice, split, and distribute in one system. Connectorization can be furnished on most cable styles. This allows for numerous construction types to be accommodated from aerial, duct, or direct burry.

FEATURES & BENEFITS

- A re-enterable terminal housing allows for fast trouble shooting and replacing of connectors
- Our Fiber Tap Plus Series is designed and tested to meet Telcordia standards
- Each product is factory terminated and tested with pre tested connectors
- Each Fiber Tap Plus provides fast drop deployment to the subscriber
- The Fiber Tap Plus Series is the Industry's most versatile mounting system with 360° mounting capability
