Telecommunications in a Sustainable World

By its very nature, the telecommunications trade uses a lot of energy and creates a sizable footprint. The ICT industry's share of global CO² emissions will soon reach 1,680 metric tons of carbon dioxide in the atmosphere.

Worried about this trend, Multilink has made our practices safer for the environment, starting with the company's all-in-one structure and extending to our equipment and recycling processes.

Our biggest claim to efficiency is that we don't need to outsource orders. Since we have both sheet metal fabrication and powder coating facilities on our campus, we're able to design, engineer and produce proprietary or custom finished products here in Ohio. By manufacturing on-site, we're creating local jobs without having to send orders over vast distances in gas-guzzling semi-trucks or use extra paper, cardboard and plastic for shipping.

Multilink also has laser cutters and servo-electric press brakes for use in metal fabrication. Instead of employing heavily motorized hydraulics to mold and cut steel, these top-of-the-line machines use 60% less energy by putting the stress on the power supply and not the machines themselves.

"Every time we've invested in new equipment, we've invested in something that is more friendly to the environment or to reduce our carbon footprint," says Multilink Production Manager Ryan Kaplan.

This equipment doesn't come cheap, but the benefits outweigh the costs; we're helping to protect the environment while saving capital by using less energy. Our products pave the way for people to communicate much more easily, which ultimately cuts down on resource usage.

In addition to selling our excess scrap to Medina Recycling, Multilink invites employees to recycle their excess plastic, aluminum and paper with receptacles in our break rooms.

And then there are the little things. A few years ago, management decided to purchase Multilink mugs for our employees. Even something small like this accomplishes three things. First, the company creates less waste because we're not throwing away hundreds of Styrofoam or paper cups every month. Second, it saves us money because the mugs are reusable. Third, it's just nice to give employees a mug. Who doesn't want a mug?

5G Cabinets

Cabinets can be an extension of your head-end, central office or even a miniature hub site. Perfect for your 5G network, Multilink's line of cabinets are engineered to withstand many different environments and levels of abuse. They are fabricated and powder coated at our facility located in Ohio and are designed for a variety of applications and climates. With options such as air conditioning, tamper switches and heat exchangers, you can be sure your equipment will be safe in a Multilink cabinet. Whatever your requirements, we have a cabinet to meet your needs.

Rack Rail Cabinets

Multilink's Rack Rail cabinets are engineered, fabricated and powder coated, at our on-site facility in Ohio, giving us complete control from the initial design to final inspection. This ensures a consistent quality cabinet each time. Designed to work with HVAC units, heat exchangers or Multilink's patented Life Saver™ roof technology, our cabinets give you options that will suit your environmental needs. Both NEMA 3 and NEMA 4 cabinet designs are available, allowing you to choose what series you will need to keep your equipment safe and working in any climate.

- » Ideal for 5G applications
- » Standard 19" rack rail mounting
- » Variety of environmentally controlled options available
- » Various mounting options (pole, wall, ground)

Wi-Fi Back Haul Cabinet (WBH) NEMA 4

This environmentally-controlled cabinet shelters your sensitive equipment from harsh elements and vandalism. Single front door access to the 19" rack mounting rails allows for 12RU or 18RU mounting capacity for the equipment. Each MDH is available with a universal mounting bracket.

STOCK ID	DESCRIPTION	DIMENSIONS	MATERIAL	POWER	HEATING/COOLING	CABLE ENTRY	MOUNTING
12RU Wi-Fi Back Haul							
030-346-10	19" rack mounting rails allows for 12RU mounting capacity for the equipment. The standard unit comes with a 1RU 24 port SC/APC Termination Panel (other options available as well as a universal mounting bracket).	29"H x 29"W x 32"D (without AC) 29"H x 39"W x 32"D (with AC)	Corrosion Resistant Powder Coated Aluminum	(1) Quad Box Receptacle w/ Service Entrance	2000 BTU HVAC w/ Integrated 500W Heater	5 Entry Knockout Holes w/ 3 Stage Entry 1.375" x 1.696" x 2.5"	Ground Pole Wall
18RU Wi-Fi Back Haul							
030-347-10	19" rack mounting rails allows for 18RU mounting capacity for the equipment. The standard unit comes with a 1RU 24 port SC/APC Termination Panel (other options available as well as a universal mounting bracket).	40"H x 29"W x 32"D (without AC) 40"H x 39"W x 32"D (with AC)	Corrosion Resistant Powder Coated Aluminum	(1) Quad Box Receptacle w/ Service Entrance	4000 BTU HVAC w/ Integrated 1000W Heater	5 Entry Knockout Holes w/ 3 Stage Entry 1.375" x 1.696" x 2.5"	Ground Pole Wall

OTE – 6001 17RU

All of the amenities of the OTE family in a smaller compact unit. An A/C unit with an integrated heater is used to control the environmental temperature inside the unit. The integrated battery tray allows for storage of battery power under the rack compartment. Three point latches on each door provide optimal security.

030-123-10	6001 w/ 4000 BTU A/C	55.25" H x 42.5" W x 39" D	Main Body: Powder Coated Aluminum Hardware: Stainless Steel	120/240VAC Service Entrance, 30A/250VAC Fuses Generator Hook-Up w/ Manual Switch (1) Duplex Receptacle, GFCI 20A, 125VAC, 60Hz (1) Duplex Receptacle, GFCI 15A, 125VAC, 60Hz (1) Power Strip, 6 Positions, 120VAC, 15A Breaker (1) Light, 18", 15W, 120V (F15 T8 CW/TSC) Controlled By Front Door Switch	4,000 or 6,000 BTU A/C w/ Integrated Heater All components are grounded to the main copper bus bar	8" x 20" Regular Opening On Bottom Back	Wall Unistrut Pad
030-120-10	6001 w/ 6000 BTU A/C						

NEMA 4 Exterior Fiber Enclosure

Multilink's selection of exterior mountable enclosures are easily adaptable into your 5G network architecture. All enclosures are available ala carte or fully loaded with splice trays and/or pigtail(s). Each cabinet has an option to be pole, wall or tower mounted. Our exterior fiber enclosures are designed to meet NEMA 4 standards so you can be sure your investment will be protected in harsh environments making it the perfect compliment for any 5G installation.

- » Durable aluminum with a polyester powder coat finish or hardened plastic
- » Additional measures of security with various door and lock options available
- » Individual compartments for separation of network and distribution terminations
- » Available with loaded termination panels and pre-connectorized pigtails

Custom 5G Cabinets

With such a variety of 5G builds, Multilink can help with your custom cabinet design. We have full in-house control from engineering and fabrication all the way to the final inspection, ensuring a consistent product every time. Multilink also has an entire building dedicated to custom fiber assemblies and connectorization allowing us to go one step farther towards a "plug and play" cabinet solution, if desired.

- » Hybrid cabinet solutions
- » Plug and play options
- » Metal and hardened plastic options
- » 100% USA made

Central Office / Head End

The Central Office / Head End (CO/HE) is the backbone of any network. Well-crafted products can make a significant difference in the **reliability and ease of use within your 5G network**. This is why we have spent many years researching and engineering our products to live up to the rigorous standards required within the CO, Data Center or HE. Our products help provide lasting quality and versatility that grows with the future of your network for years to come.

Patch Panels

Properly designed patch panels are a vital piece in any network and 5G is no exception. With the influx of new fiber being deployed to support the ever increasing need for bandwidth, patch panels are an essential, yet sometimes overlooked piece of the puzzle. Each rack mount patch panel is engineered from the ground up with many features and options available. Our rack mount panels can be customized with up to 288 fiber connections using traditional (and readily available) adapter panels and 144 connections using our patented CT-X cassettes.

- » Standardized 19" and 23" rack mount compatibility
- » Customizable configurations
- » High fiber capacity
- » Excellent fiber management

Patch Panels – Signature Series

Multilink's Signature Series of patch panels offer more versatility than standard models. They are compatible with various bulkheads, allowing them to interface with standard adapter panels as well as our CT-X Cassettes and Fiber Termination Modules. Multilink's patch panels are designed with flexibility in mind to help make network installation and maintenance easier and more efficient where patching and/or splicing is needed.

Note: Both a bulkhead and a main patch panel must be ordered separately to form a complete unit.

Patch Panels – Signature Series Bulkhead Options

Multilink’s interchangeable bulkhead options for our Signature Series of patch panels are compatible with standard adapter panels as well as our industry-leading CT-X Cassettes and Fiber Termination Modules. At Multilink, we like to make network installation and maintenance as quick and easy as possible, while maintaining high quality. Our bulkhead panels offer a variety of efficient and cost-effective solutions for fiber optic patching and splicing.

Note: Both a bulkhead and a main patch panel must be ordered separately to form a complete unit.

Fiber Deployment Modules

Our engineers have designed a series patch and splice modules to compliment our line of patch panels. These modules can be installed quickly and offer safe, efficient cable storage and termination. All of our Fiber Deployment Modules (FDM) are manufactured in-house and built to Telcordia and Six Sigma Standards. Our FDM kits are incredibly flexible, allowing you to easily upgrade or add on to an existing wall and rack mount configuration. Choose from one of our standard options or customize your module to fit your network's needs.

- » Patch and splice in one cassette
- » Intuitive fiber storage
- » Easily installed for upgrades
- » MPO Versions Available

Coupler/Splitter Modules

Fiber optic splitters are becoming more and more common in today's network design and fiber buildouts. Multilink's line of splitters are available for rack mount, LGX, cassette and small form PLC configurations. Each splitter is terminated and quality tested to ensure it falls within the listed specifications. Small form splitters are ideal for use where space is an issue, such as in a terminal where secondary splitting is needed. Our rack mount splitters are ideal in a data center, head end and central office. **With so many options available, we have included a configurator below to customize the ideal splitter for your application.**

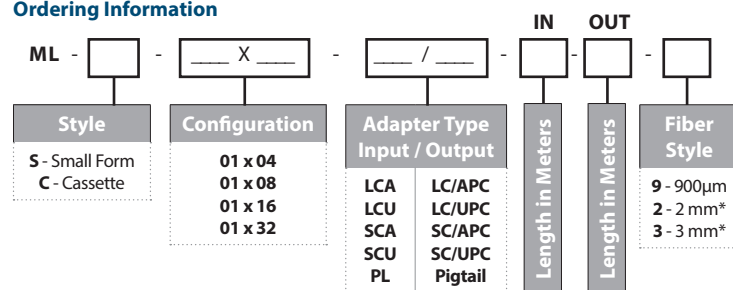

- » PLC Telcordia compliant GR1221
- » Low Insertion Loss (IL) and Low PDL

Closures / Terminals

Multilink offers a number of different fiber optic closure systems in a variety of sizes, deployment types and applications. Our closures have all been designed with ease of access in mind to reduce installation and service times. Pair our closures with our field installable connectors to create one of the most versatile closure/terminal systems on the market.

Optima™

page 37

Fiber Tap Plus™

page 43

Splice Enclosures™

page 50

Optima™ Fiber Optic Closures

Multilink's Optima™ closures alleviate many of the headaches found in today's FTTX deployments by eliminating the use of hardened connectors in favor of standard SC and LC connectors, making field installations easier and economically feasible. The Optima™ S features separate splicing and drop partitions, allowing for installs without disturbing the splicing partition. The Optima™ T and C4 are pigtailed closures which favor the design of many MST's available today, without the need for a hardened connector. The Optima™ series uses standard connectors thus eliminating the need to stock different lengths of pre-terminated drops. This allows field termination of bulk fiber and prevents drop fiber waste to save money. Additionally, a splitter can be installed if secondary splitting is required.

- » Cost effective design
- » Re-enterable terminal allows for repair without complete replacement
- » Separate drop and splicing compartments

 gomultilink.com/categories/5g-products/closures-terminals/optima

FIELD INSTALLABLE FRIENDLY | NON-PROPRIETARY | VERSATILE

Optima™ S Fiber Optic Closure

The Optima™ S closure is a splice closure and terminal in one housing. The Optima™ S was designed with the ability to have your main fiber enter via any of the 4 non-captive entrances, perform a ring cut, access only the fibers you need, store the remaining tubes and continue to the next enclosure. The Optima™ S has a separate drop partition allowing an install to be done without having to disturb the main fiber partition. For larger fiber counts up to a 144, the Optima™ S16 is an ideal choice as it was designed with larger fiber counts in mind.

- » Provisions for field installation & termination
- » Uses standard SC or LC connectors.
- » Re-enterable drop compartment for troubleshooting and connection replacement

Optima™ T Fiber Optic Closure

The Optima™ T Fiber Optic Closure is perfectly suited for end fiber deployment in your network with options for either one or two fiber entrance ports at the base of the closure. The Optima™ T serves as a perfect complement to the Optima™ S by allowing you to extend your plant using pre-terminated pigtails. The use of standard SC/LC connectors and four port terminal capacity options makes field installation and maintenance incredibly easy.

- » Factory terminated & tested
- » Provisions for field installation & termination
- » Pre-terminated feeder cable ends **or** non-connectorized stub ends
- » Re-enterable drop compartment terminal for troubleshooting and connector replacement
- » Available in 4, 6, 8 or 12 port terminal capacity

Fiber Tap Plus™ Series

The Fiber Tap Plus™ Series of enclosures is designed for fiber builds where a hardened connector is the preferred method of drop deployment. The Fiber Tap Plus™ Cross Connect (much like the Optima™ S) allows for splicing. The standard FTP's are available as a kit to install your own fiber assembly or with a pre-terminated pigtail. Both the Cross Connect and Fiber Tap Plus™ use industry standard bulkheads that are compatible with an OptiTap® hardened drop connector. Also available to compliment the FTP, is a field installable hardened connector that allows you to do an install using bulk fiber or repair a damaged drop without having to replace the entire drop. As with the Optima™ series of enclosures, options such as a splitter or pigtail can be installed.

- » Re-enterable terminal
- » Compatible with standard hardened connectors utilized in many existing networks

 gomultilink.com/categories/5g-products/closures-terminals/fiber-tap-plus

Multilink
Simply More...

FIELD INSTALLABLE | COMPACT | RE-ENTERABLE

Fiber Tap Plus™ Subscriber Terminal

Multilink's Fiber Tap Plus™ (FTP) Subscriber Terminal offers flexibility, reliability and is compact to encourage fast and easy subscriber drop installation in FTTX applications. Available in 2, 4, 6, 8 and 12 port terminals, the FTP can be ordered in various configurations to meet your network requirements and uses standard OptiTap® connectors. Hardened connectors and drop assemblies make the FTP highly resistant to wear and tear. In addition, the unique re-enterable housing reduces maintenance costs by allowing for minimal installation and service times.

- » Available in 1 or 2 drop feeder ports
- » Re-enterable terminal
- » Compatible with standard hardened connectors utilized in many existing networks

NOTE: Other increments available through special order. Also available with toneable pigtails.

Fiber Tap Plus™ Cross Connect

Multilink's Fiber Tap Plus™ Cross Connect is very similar to the Optima™ S as it provides a splice enclosure and terminal in one housing. It has (4) non-captive entrances which allows you to do a ring cut, access only the fibers you need, store the remaining tubes and continue to the next enclosure. The Cross Connect can be ordered with various options such as splitter or pigtail and will accept a range of different fiber cable counts and diameters. Because the Cross Connect uses industry standard bulkheads, it can easily be deployed in an existing fiber build that uses OptiTap® connectors or as an extension to feed a new home. As an added feature (also available in the Optima™ S) we have designed specialized grommets to make the Cross Connect one of the most versatile closures on the market today.

- » Provisions for field installations
- » Fast drop deployment to the subscriber
- » 4, 6, 8 or 12 port bulkhead capacity and 72 splice capacity (double stacked)
- » Uses industry standard hardened connectors and bulkheads

Surelight® H IP Fiber Drop Assembly

Multilink's Surelight™ H IP is a fiber drop assembly solution with a factory terminated OptiTap® compatible connector. It pairs with our Fiber Tap Plus™ lineup as well as terminals using OptiTap® bulkheads. The assembly's hardened connector is designed to withstand the elements and offer superior durability and reliability in a connection. Our Surelight™ H IP fiber assemblies are available in multiple fiber lengths to meet the needs of your FTTX drop deployment.

- » FTTX Optical Networks
- » Compatible with Multilink® Fiber Tap® and Corning® OptiTap® Multiport Terminals
- » Environmentally and mechanically stable for OSP applications

Splice Enclosures

Multilink's line of splice enclosures includes both in-line and dome configurations and are made to support a wide variety of fiber optic cable types and counts. Our dome style enclosures feature a large slack storage basket and split end plate which includes (2) multicentric grommets for mid-span access. Our series of in-line style enclosures offers the ability to choose to enter the enclosure in both a butt or in-line style configuration giving you greater installation flexibility. Our enclosures can be installed above or below grade and require no special tools for installation.

- » Size variety for various fiber capacities
- » Multicentric grommet for numerous cable sizes
- » Split end plate for mid-span access deployments
- » No special tools needed

LARGE SLACK STORAGE AREA | INTUITIVE DESIGN

4024-D Starfighter™ Dome Enclosure

The Multilink 4024-D Starfighter™ Fiber Optic Dome Splice Enclosure is an “all parts” inclusive, hermetically-sealed splice enclosure designed for ease of assembly and re-entry. The closure features a gasketed split end plate for mid-access cable applications and an easy to install “no special tool” sealing system. All major hardware is factory installed to allow for quick field installation. The unit has universal grommets along with compression style lateral or branch cable seals that make the enclosure's installation process simple and intuitive. This small-capacity enclosure is suited for a lower amount of splices and can be mounted appropriately for aerial, pedestal, and underground applications.

- » Completely sealed with compression seal technology
- » Ease in installation requiring no special tools
- » GR-771 and CATV industry compliant
- » Mid-access design for installation over existing cables without disturbing a working cable
- » Above or below grade

4000-D Starfighter™ Dome Enclosure

The Multilink Starfighter™ 4000-D Dome Splice Enclosure is a large-capacity enclosure designed for above or below grade applications and supports 6 or more cable entries. The enclosure features a unique gasketed split end plate system that allows for mid-access cable applications up to 1.125" in diameter. Up to 6 branch or lateral cables can be added to any one of four compression seal entry ports utilizing multi-port grommets available for the enclosure. The enclosure requires no special tools, adhesives, or mastics for installation. The new unibody slack storage basket and hinged splice trays allow for maximum storage and access of fiber and fiber bundles.

- » Completely sealed with compression seal technology
- » Ease in installation requiring no special tools
- » GR-771 and CATV industry compliant
- » Mid-access design for installation over existing cables without disturbing a working cable
- » Can be used for above or below grade applications

1120-F Starfighter™ MiniButt Splice Enclosure

The 1120-F Starfighter™ MiniButt is a low-capacity fiber optic splice enclosure designed for use in low count fiber splicing applications and environments where space is a constraint. This enclosure features an integrated gasket that prevents water ingress while allowing for easy access via your choice of in-line or butt configurations for even the largest cables.

- » Supports both in-line and butt configurations
- » Lightweight and compact
- » Up to four cable entries with cable OD range of 0.3" to 0.63"
- » Suitable for above or below grade installations
- » Constructed with impact and corrosion resistant materials
- » Integrated "F" pressure testing valve and grounding lugs
- » Up to 24 single fusion splices or 96 mass fused fibers
- » Equipped with all parts required for normal splicing applications
- » RUS Listed

2000-F Starfighter™ Splice Enclosure

The 2000-F Starfighter™ is a medium-capacity fiber optic splice enclosure designed for splicing applications in both above and below grade installations. The enclosure supports both aluminum and plastic splice trays and features an integrated gasket that prevents water damage while allowing for ease of access to the unit. The unit, which can hold four fiber cables, is compact and manufactured with durable impact and corrosion resistant materials.

- » Supports both in-line and butt configurations
- » Lightweight and compact
- » Up to four cable entries with cable OD range of 0.3" to 0.63"
- » Suitable for above or below grade installations
- » Constructed with impact and corrosion resistant materials
- » Integrated "F" pressure testing valve and grounding lugs
- » Up to 72 single fusion splices or 288 mass fused fibers

3000-F Starfighter™ Splice Enclosure

The 3000-F Starfighter™ is a high-capacity in-line splice enclosure designed for use in both above and below grade applications at major splice points in your network. The 3000-F supports both in-line and butt configurations and is expandable through an optional cable expansion kit. This enclosure features an integrated gasket sealing along with a patented cable seal to prevent water ingress while allowing for easy access for even the largest cables.

- » Mid-span access cables up to 1.1" in diameter
- » Supports both in-line or butt configurations
- » Up to eight cable entries with cable OD range of 0.3" to 1.1"
- » Suitable for above or below grade installations
- » Constructed with impact and corrosion resistant materials
- » Integrated "F" pressure testing valve and grounding lugs
- » Up to 288 single fusion splices or 768 mass fused fibers with cable addition kit
- » Equipped with all parts required for normal splicing applications
- » RUS Listed

Specifications

Exterior Closure Length	21.5" (53.66cm)
Exterior Closure Width	12" (20.96cm)
Exterior Closure Depth	4.5" (20.32cm)
Cable Entry	(4) Branch or Lateral (8) with CAK
Cable Diameter Max. Min.	1.124" (28.55mm) .375" (9.525mm)
Material	5720U Xenoy
Splice Tray Capacity	(4) 3000-SSTA with Cable Addition Kit (8) 3030-SSTP with Cable Addition Kit

Starfighter™ Optical Terminal Enclosure

Multilink's Starfighter™ Optical Terminal Enclosure (OTE) is an in-line terminal enclosure designed to support both traditional and optical drop splicing. With a durable and impact-resistant polyethylene material, it is specifically crafted for outside plant environments. The terminal boasts four ports on each end, supports express cabling, allows for the addition of branch/lateral cabling and possesses various mounting capabilities, meaning it can fit into any network infrastructure. This Starfighter™ model works well as a drop splicing enclosure since it is compatible with a variety of drop designs and can withstand rough environmental factors. The OTE can perform up to 36 drops in FTTH applications and comes equipped with all the hardware required to seal and secure your express/feeder cables as well as a 12-fiber splice tray.

- » Easy to assemble cable sealing and retention system
- » Reduces operating costs by allowing customers to purchase additional capacity only when needed
- » Reduces enclosure inventory and is suitable for a wide variety of above grade installation and mounting applications
- » Universal above grade optical fiber splicing and termination capability
- » High impact resistant and UV resistant thermoplastic for long life
- » Supports PON components as well as optical connectorized terminations
- » Provides all-in-one sealing and strain relief of individual drops
- » Mid-access capable for cables up to 1.125" in diameter

Fiber Assemblies

Multilink's in-house fiber shop allows us to configure a wide array of fiber optic assemblies with minimal lead times. Options include jumpers, pigtails and drop cables with standard connectors and adapters (SC, LC, ST, IP) as well as a host of other choices. Our on-line interactive [fiber assembly configurator](#) offers a hands-on approach to help you design your ideal assembly. Included with every assembly is an insertion loss test result so you know how your assembly will perform. Whether you're using them for indoor or outdoor applications, all our assemblies are built using bend-insensitive fiber, end-face geometry testing and strict ISO 9000 quality management standards.

- » Minimal lead times
- » Extensive customization options
- » Terminated to meet or exceed Telcordia standards
- » Indoor and outdoor applications

On-line Fiber Configurator

 gomultilink.com/fiber-configurator/

Product Configurators: The More Accessible, the Better

Configurators are powerful tools that allow businesses to communicate with customers to create custom-tailored products that fulfill requirements. Gone are the days of complex order forms, tiny mistakes and long processing times; now, companies with a strong web presence allow consumers to select options directly.

The rise in on-line visualization technologies is directly tied to the increasing presence of configurators that eliminate user error. As web design has improved, well-crafted websites –

even corporate ones – have been built with user experience in mind, so that anyone can learn their way around them without issue. To cut down on mistakes and frustration, the tools housed on these websites need to be similarly approachable.

That's the philosophy Multilink had in mind when we created our on-line interactive fiber assembly configurator. This handy tool allows customers to personalize their fiber assemblies, allowing them to select everything from major compo-

nents such as fiber and connectors all the way down to details such as boot type and color.

The configurator has a number of handy features to make the process as smooth as possible. It illustrates a picture of what your assembly will look like as you're building it, allowing you to visualize the finished product. Additionally, the configurator is responsive – no matter what combination of components you choose, the configurator will only present you with possible options.

Pigtails | For Use In Fiber Distribution Enclosures

MPO configurations are available by special order, if noted.

Not All Products Meet Our Quality Standards

At Multilink, many of our original products and ideas get left on the cutting room floor, and that's perfectly fine with us. We focus on delivering dependability through the measures we take in quality control.

We believe that transparency is the best way to make quality happen; if people know how our production process works, they have a better idea of how good of a job we do. And since we always do a good job, what do we have to hide?

Multilink's product creation system is based on ISO 9000 international quality assurance standards. ISO 9000 focuses on seven quality management principles: customer focus, relationship management, evidence-based decision making, improvement, process approach, engagement of people and leadership.

But our high standards extend beyond that, and custom-tailored products are one of the ways we follow through on that promise. Multilink's standard products have been designed to meet all your needs out of the gate, but we understand that today's tele-

communications companies need to face unique challenges and requirements.

Don't see what you need in our current lineup? We'll work directly with you to configure any of our goods to meet your exact specifications. Our engineers and designers follow all custom products through the planning, manufacturing and finishing processes to ensure everything is built and works correctly.

As with any quality check, it's about the details and those details are critical when it comes to fiber. Meeting the demands of fiber optics standards, our fiber department provides various tests such as insertion loss and return loss on each fiber pigtail prior to shipping. Detailed results are printed and provided with every order.

Anyone who visits [GoMultilink.com](https://www.multilink.com) will notice Eugene, another helpful tool that helps us fulfill our

commitment to quality. Eugene is a virtual chat assistant who lives in the bottom-right corner of our website. He helps answer our customers' questions about Multilink's products and services and can even put visitors directly in touch with one of our product specialists or customer sales representatives.

Our interactive on-line fiber assembly configurator shows how your assemblies will look and function before we even build them, providing you with further clarity and control over our step-by-step production process. This tool is great for pitching and planning new network development projects.

Having an overarching commitment to quality certainly isn't easy, and it's disappointing that some products never see the light of day, but the good outweighs the bad. Our items can only function properly if we hold them and ourselves to high expectations, which means that some of them will be left behind. Others require small tweaks or changes, while even more need to be reworked entirely before they hit the market. But you know what? That's okay, because at the end of the day, we're here to make sure your connections work. **Multilink: Simply More.**

Innovations at Work!

- 2019** Patented Fiber Optic Splice Tray and Enclosure
Patented Modularly Expandable Enclosure
Patented Field Installable Connector System for Drop Cables and the Like
Patented Attachment Apparatus for Field Installable Cable Termination Systems
- 2018** Patented Field Installable Cable Termination System and Method
- 2014** Patented Container Cover/Door with High Security Locking System
Patented Base Plate of Optical Fiber Splice Cassette
- 2012** Patented Telecommunications Mounting Enclosure
- 2011** Patented Cable And Overlay Moldings
Patented Exterior Downspout Raceway System For Cables
- 2010** Flex Grid Internal Mounting on Plastic Boxes
- 2009** Patented Slack Cable Storage Box
- 2008** Patented Slack Cable Storage Box w/ Adjustable Height Spools
Slack-N-Roll Storage Device
Dual Wall Heat Transfer System For Outdoor Enclosures
- 2007** First Web Video Installation Training For Fusion Splicing and Power Supply
FTTX Fiber Optic Slack Storage Enclosure
FTTX Overlay Molding For Existing Molding
FTTX Exterior Fiber Optic Slack Storage Enclosure
- 2005** Drop Fiber Sno-Shoe
Multipath Pavement Duct System
5 Amp Min. Stand By Power Supply
Direct Core Cooling
Open Face Molding
- 2004** Compression Seal Technology Dome Enclosure
Tech Bag For Handling Converters
- 2002** Patented Communication Cable Clip
- 2001** Patented 2 Versions of Aerial Storage Unit for Fiber Optic Cable
- 2000** Release of 1st Airflow Power Supply Cabinet
- 1999** Patented Cable Support Bracket
Patented The 1st Uninterruptible Power Supply With Polarity Of Inverters CCP Tech
- 1998** Patented Sealing Fiber Optic Entryways to a Sealed Enclosure
- 1997** Patented Cable Identification Tag
- 1995** Patented Aerial Storage Unit for Fiber Optic Cable
- 1993** Patented And Trademarked First Plastic Sno-Shoe
Patented Hollow Coving for Concealing Electrical Wires
- 1992** Patented Torque Signalling Wrench
Patented Cover Securing Element Chamber for a Cable Television Subscriber Receptacle
- 1991** Patented Cable Stripping Device
