

ARCHITECTURAL RACEWAY MOLDING

Steel Molding
Indoor Plastic Molding
Outdoor Plastic Molding

Multilink started its innovative journey in 1983 and has grown into one of the largest manufacturers of CATV product solutions. Providing many different solutions, we pride ourselves on being one of the most versatile manufacturers in the industry. We do this by working closely with our customers to provide the most innovative solutions to fit their demands.

Technologies and markets continually change, we know that and are here to adapt to those changes. It is our core responsibility, at Multilink, to build the right product to meet your needs while maintaining the premium quality you expect. Our engineering department works closely with our research and development department to ensure our core responsibilities.

With an adaptive business practices we look forward to continue our growth in the years to come, providing many more innovative solutions to our customers.

Multilink proudly engineers and manufactures our products in the USA with our headquarters based in Elyria, Ohio.

We stand behind the quality of our products. Following Six Sigma processes ensures quality in everything we do.

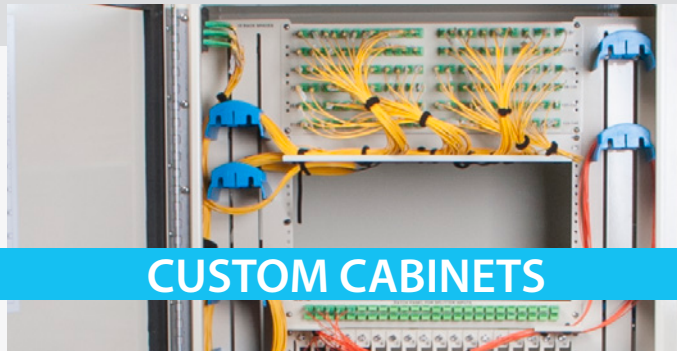

OTHER OFFERINGS

POWER SUPPLIES

Various power solutions for any Fiber Deep and MDU applications. Our power supplies are manufactured in house and we provide full installation training to help installations run efficiently.

We design and manufacture custom cabinets daily. Let our engineering department design your next cabinet for your network needs.

CUSTOM CABINETS

FTTX SOLUTIONS

Our FTTX solutions provide numerous solution for your network. Our lineup includes aerial, pedestal, vault and indoor/outdoor network solutions.

We offer factory or field terminated products on various custom fiber assemblies. All in house assemblies are terminated and tested to meet Telcordia quality standards.

Steel Molding

Multilink's metal molding provides clean cable routing. The metal molding lineup includes everything from straight run pieces to angle and corner pieces. All parts and pieces are manufactured by Multilink right in the USA. We stand by the quality of our products against many things such as cracking and warping. The longevity of our molding will provide many years of operational use.

Latch Duct Molding

Multilink's Latch Duct Interior Plastic Raceway System is a 1 piece design that hinges open for installation access. The molding can be used to route and protect cabling for low voltage data, voice, video, and fiber optic applications. Fittings are available for routing direction changes, extending, and terminating the molding. All bases incorporate a 1" minimum bend radius as recommended for fiber optic cables. The molding is manufactured using a special purpose profile extrusion alloy resin and the fittings are manufactured using an injection grade resin. The product can be painted with latex paint.

Cove Molding

Multilink's Plastic Cove Molding System is a 2 piece design in which the molding can be used to route and protect cabling for low voltage data, voice, video, and fiber optic applications. Fittings are available for routing direction changes, extending, and terminating the molding. All bases incorporate a 1" minimum bend radius as recommended for fiber optic cables. The molding is manufactured using a special purpose profile extrusion alloy resin and the fittings are manufactured using an injection grade resin. The product can be painted with latex paint.

Quarter Round

What is truly unique about Multilink's Raceway Molding system, with an emphasis on Ground Mounted Quarter Round, is that they are designed and built specifically for fiber optic cable. This is the reason why Multilink is the first choice by the top 5 telecommunication operators when purchasing molding for both their outside and inside plant. Some of our unique moldings are the Downspout Raceway System and our newly patented Micro Molding™. Our Raceway Molding systems are fast, simple, easy, and re-enterable. They are made to comply with UL listed specifications.

Hinged Overlay

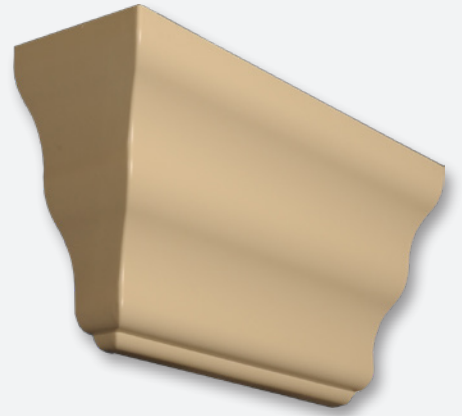

Multilink Hinged Overlay Molding Raceway System is a 2 piece design with a base and cover. The molding can be used to route and protect cabling for low voltage data, voice, video, and fiber optic applications. Fittings are available for routing direction changes, extensions, and termination of the molding. All fittings incorporate a 1" minimum bend radius as recommended for fiber optic cables. The molding is manufactured using a special purpose profile extrusion alloy resin and the fittings are manufactured using an injection grade resin. The product is easily painted with latex paint.

Flat Box

Multilink's Flat Box Plastic Raceway System is a 2 piece design that hinges open for installation access. The molding can be used to route and protect cabling for low voltage data, voice, video, and bend insensitive fiber optic applications. Fittings are available for routing direction changes, extending, and terminating the molding. The molding is manufactured using a special purpose profile extrusion alloy resin and the fittings are manufactured using an injection grade resin. The product can be painted with latex paint.
